

Software, Services and Suppliers Section

S⁴

This is the reference section in the *Technical and Software Bulletin* which is designed to offer a selection of appropriate software, equipment and services suppliers for geomorphologists and environmental scientists. S⁴ is in two parts. Firstly a comprehensive list of product codes is given, and then the names of commercial companies offering products are listed under the relevant headings. The list, and therefore the entries, necessarily reflects the editor's experience but should indicate the future scope of the section. The full name and contact address of each is then given in the second part of this section. Readers and users are invited to comment on the list or to suggest additional names for inclusion in future editions of the *Bulletin*. Alternatively, suppliers who may wish to be included are invited to contact Chris Windass at the

Department of Geography, The University of Hull, Hull, HU6 7RX, UK.

The product codes used in this edition of the *Bulletin* are taken from the following list: Accessories, Anemometers, Buoys, Charts, Chart recorders, Connectors, Consultants, Corers, Courses, Current meters, Data acquisition cards, Depth sensors, Electronic components, Geotechnical equipment, Hydrographic surveying, Maps, Meteorological information, Meteorological instruments, Microcomputers, Pollution sensors, Publications, Satellite imagery, Sediment grabs, Software, Surveyors, Suspension sensors, Telemetry systems, Temperature sensors, Terrestrial surveying, Tide gauges, Water chemistry sensors, Water level recorders, Wave recorders, Weather stations.

PRODUCT CODES

Accessories

InterOcean (cable winches, releases)
OTT (cable drums)
Valeport (cable winches)
Wavemaking Technology (waves)

Anemometers

Autonnic Research (speed and direction)
TSI Inc (laser Doppler)
Vaisala (speed and direction)
Vector Instruments (speed and direction)

Buoys

Balmoral Group Ltd (buoys and platforms)
InterOcean (buoys)

Chart recorders

Chessell Ltd (paper)

Connectors

Valeport (electrical)

Consultants

Arco Consultants (planning)

Corers

Valeport (grabs)

Courses

RMCS (software courses)

Current meters (c.m.)

Aanderaa (rotor c.m.)
Concepts (impellor c.m.)
Endeco (propellor c.m.)
General Oceanics (winged c.m.)
